

The deck style kit

Everything you need to build the pitch deck in PRAHARI's look — the same sovereign-platform aesthetic as the site & console. Copy the hexes, match the type, follow the slide recipes. Click any swatch to copy it.

THE ONE RULE

Light paper, a calm **serif** headline, **one** bold accent per slide, and a lot of air. Numbers get the hero treatment. Nothing is cramped; every slide makes one argument.

Palette

A near-white ground with ink text. The saffron→peach warmth and the gold serif numerals are the signature; indigo is the interactive accent; green/red are reserved for meaning (safe / threat), never decoration.

GROUND & INK

#F8F8FA Paper (slide bg) #F8F8FA	#FFFFFF Card / panel #FFFFFF	#16161D Ink (headings) #16161D	#111827 Navy (CTA fill) #111827	#4B5563 Body text #4B5563
#9CA3AF Muted / captions #9CA3AF	#E7E7EC Hairline / divider #E7E7EC			

SIGNATURE ACCENTS

#E87040 Saffron (band) #E87040	#F5A060 Peach (band, soft) #F5A060	#A9834F Gold (big numerals) #8A6A3E → #C8A878	#C8C8F0 Lavender (hero wash) #C8C8F0	#4F46B8 Indigo (interactive) #4F46B8
#6BBF7A Sage (bullet markers) #6BBF7A				

SEMANTIC — MEANING ONLY, NEVER DECORATION

#059669 Good / contained	#DC2626 Threat / critical	#B45309 Elevated / flagged
--	---	--

Type

Three families do everything: a calm serif carries every headline and every big number, a clean sans handles body & UI, and a mono is reserved for data (IDs, hashes, timestamps, scores). Sizes below are in points for a standard 13.33" × 7.5" (16:9) slide — double them for a 1920-px design.

Source Serif 4 — display

The breach that never happened

Every headline & every hero number. Weight 400 (regular) — never bold. Specimen shown in Georgia if Source Serif 4 isn't installed.

Inter — body & UI

Behavioural detection, graph correlation, auditable autonomy. Clean, quiet, legible — the connective tissue between the serif moments.

JetBrains Mono — data

INC-001 • MTTD 1.66 d • anchor 0.308 ≥ 0.15 • 6f8c34a1...

Only for machine facts — event ids, hashes, scores, timestamps. It signals "this is real evidence."

ROLE	FAMILY	SIZE (16:9 PT)	WEIGHT
Title slide H1	Serif	44–54 pt	400
Section heading H2	Serif	30–38 pt	400
Big stat number	Serif	60–96 pt	400
Body / bullet	Sans	16–18 pt	400
UI label / button	Sans	13–15 pt	600
EYEBROW / KICKER	Sans caps	11–12 pt • tracking +160	650
data • IDs • hashes	Mono	12–14 pt	400

FAMILY	INSTALL (FREE, GOOGLE FONTS)	POWERPOINT-SAFE FALLBACK
Serif	Source Serif 4	Georgia
Sans	Inter	Calibri / Arial
Mono	JetBrains Mono	Consolas

Tip: install the three fonts on the machine that will *present*, or embed them — File → Options → Save → "Embed fonts in the file."

The signature moves

Four recurring devices carry the identity. Use them and the deck reads as PRAHARÍ; skip them and it drifts generic.

☉ Saffron stats band

A warm gradient strip that fades in and out top & bottom, white serif numerals on top. One band per deck — the "proof at a glance" slide.

☉ Gold serif numerals (on white)

92.3% <1s

A gold gradient fill on the serif number. Reserve for the money metrics — scale is the story.

☉ Pill controls & tags

Open the console

Read the source

AUTO-SELECTED

Everything interactive or labelled is fully-rounded (999px). Dark navy = primary, white/outline = secondary, indigo-tint = a small status tag.

☉ Soft rounded cards

ASSESSMENT

Content sits in generous white cards — 20–44 px radius, a soft low shadow, never a hard border.

Big radius + soft shadow = the whole page feels calm. One idea per card.

Slide recipes

Four repeatable layouts cover most of a pitch. Keep the floating pill nav on content slides; drop it on the full-bleed title & the stats band.

INDIA'S SOVEREIGN CYBER-RESILIENCE PLATFORM

The breach that never happened

Title — centered serif over a soft lavender wash, indigo eyebrow, one green accent word.

1.66d 100% 92.3% <1s

MTTD

Recall

ATT&CK

Contain

Proof band — the saffron gradient full-bleed, 3–4 gold serif numbers, tiny labels. The "numbers" slide.

PRAHARÍ

THE SYSTEM

One closed, auditable loop

3-up soft cards / diagram

PRAHARÍ

EVERY CLAIM DRILLS TO EVIDENCE

2.60 Remote Services WS03 ~ DC01

0.29 Valid Accounts exsm.clerk ~ WS03

0.68 Phishing powershell.exe

Section + card — centered serif heading, one supporting line, content in a big white card or a 3-up.

Evidence — a soft card holding a light table; sans names lead, mono facts + colour-chips follow.

Doing it in PowerPoint / Keynote / Slides

The look is achievable with native shapes — no plugins.

Saffron band

A full-width rectangle → Format Shape → **Gradient fill**, direction top-to-bottom, 4 stops: `#F8F8FA 0%` → `#E87040 30%` → `#EC A862 70%` → `#F8F8FA 100%`. The transparent ends make it float.

Gold numbers

Type the number in the serif, then Text Fill → **Gradient**: `#8A6A3E` → `#C8A878` → `#9C7C4E` at ~160°. On the saffron band, use solid `#FFDFE9` instead.

Pills & the nav

Rounded Rectangle → drag the corner handle to **full radius**. Nav = a white pill across the top with a soft shadow; primary button fill `#111827`, ghost = white with a `#D8DBE2` 1.5 pt outline.

Soft cards & shadows

Rounded rectangle, corner radius ≈ `0.25"`, fill white, no line. Shadow: outer, blur ~30, distance ~12, transparency ~86%, colour navy. Subtle — you should barely see it.

Do & don't

DO

- Keep slides light & airy — one argument each.
- Let the serif headline + one big number carry the slide.
- Use the real console screenshots (already in the repo) inside soft white cards.
- Reserve green for "contained/prevented," red for "threat."
- Lead with the honest evidence order: external benchmark → frozen transfer → in-domain.

DON'T

- No dark "hacker" slides, neon, or matrix rain — this brand is calm daylight.
- Don't bold the serif or stretch it — weight 400, real letterforms.
- Don't use green/red/indigo as decoration — they mean things.
- No hard borders or drop-shadowed clip-art; soft cards only.
- Don't crowd — if a slide has two ideas, it's two slides.
